IN THE CLAIMS

Please amend the claims as follows:

- 1. (Cancelled).
- (Currently Amended) The apparatus as claimed in claim 225, wherein:

the verifier determines the authorization based on a verification of a presence of an entirety of a data set corresponding to the received material.

 (Currently Amended) The apparatus as claimed in claim 225, wherein:

said storing means stores the damaged version on a removable media.

4. (Currently Amended) The apparatus as claimed in claim 225, wherein:

said storing means stores the damaged version in a temporary storage device, and stores the repaired version in a permanent storage device.

	5. (Currently Amended)
	apparatus for receiving, protecting and storing material, said
	apparatus comprising:
	input means for receiving material in an unprotected form
5	from a remote source;
	means for generating a damaged version of said received
	material;
	means for storing said damaged version of said received
	material;
.0	a verifier for determining an authorization to process
	said received material; and
	means for repairing the damaged version of said received
	material in response to said verifier determining the
	authorization,

15 wherein:

the damaging means damages a select portion of the received material to form the damaged version, and the repairing means repairs a corresponding select portion of the damaged version to form the repaired version.

6. (Previously Presented) The apparatus as claimed in claim 5, wherein the apparatus further comprises:

5

7. (Previously Presented) The apparatus as claimed in claim 5, wherein

the damaging means comprises:

a first device for damaging the select portion of the received material via an exclusive-OR function with a key, and the repairing means comprises:

a second device for repairing the select portion of the damaged version of the received material via an exclusive-OR function with the key.

(Previously Presented) The apparatus as claimed in claim 7, wherein

the key is provided via a random process.

9. (Previously Presented) The apparatus as claimed in claim 8, wherein

the key includes a series of random numbers that are provided via a pseudo-random process based on a key-seed.

914-332-0615

10. (Previously Presented) The apparatus as claimed in claim 7, wherein

the key is destroyed if the verifier fails to determine the authorization.

(Currently Amended) The apparatus as claimed in claim 225, wherein said apparatus further comprises:

means for rendering the received material while the verifier is determining the authorization.

12. (Cancelled).

13. (Currently Amended) The method as claimed in claim 1216, wherein

the determining the authorization step is based on a verification of a presence of an entirety of a data set corresponding to the received material.

14. (Currently Amended) The method as claimed in claim 1216, wherein

the storing the damaged version step includes storing the damaged version on a removable media.

5

15

the storing the damaged version step includes storing the damaged version in a temporary storage device, and wherein the method further comprises the step of:

storing the repaired version in a permanent storage device.

	16. (Currently Amended) The method as claimed in claim $12\underline{A}$
	method of receiving, protecting and storing material, said method
	comprising the steps of:
	receiving the material in an unprotected form from a
5	remote source;
	generating a damaged version of the received material;
	determining an authorization to process the received
	material;
	storing the damaged version of the received material while
10	determining the authorization; and
	repairing the damaged version of the received material to
	form a repaired version of the received material after determining
	the authorization,
	wherein:

PHUS010313-AMT-052506

of the received material to form the damaged version, and wherein

said generating steps comprises damaging a select portion

said step of repairing the damaged version comprises repairing a corresponding select portion of the damaged version to form the repaired version.

17. (Previously Presented) The method as claimed in claim 16, wherein

said step of damaging a select portion of the received material includes performing an exclusive-OR operation on the select portion with a key, and

said step of repairing the damaged version includes performing an exclusive-OR operation on the corresponding select portion of the damaged version with the key.

- 18. (Previously Presented) The method as claimed in claim 17, wherein said method further comprises the step of:
 - generating the key via a random process.

19. (Previously Presented) The method as claimed in claim 18, wherein

the step of generating the key includes generating a series of random numbers via a pseudo-random process based on a key-seed.

5

20. (Previously Presented) The method as claimed in claim 17, wherein said method further comprises the step of:

destroying the key if a failure is reported in determining the authorization.

21. (Currently Amended) The method as claimed in claim 1216, wherein said method further comprises the step of:

providing an undamaged version of the received material for rendering while determining the authorization.

22. (Cancelled).
